

NymeriaExceptions

```
classDiagram
    NymeriaInvalidSecurityDistance --|> NymeriaExceptions
    NymeriaParamExc --|> NymeriaExceptions
```

The diagram illustrates a class hierarchy. At the top is the 'NymeriaExceptions' class. Below it are two subclasses: 'NymeriaInvalidSecurityDistance' on the left and 'NymeriaParamExc' on the right. A horizontal line connects the two subclasses, with vertical lines extending upwards from each to a central point. From this point, an arrow points upwards to the 'NymeriaExceptions' class, indicating that both subclasses inherit from it.
